

Netlogic Consulting

For Nonprofits

Supporting the people doing
the work that matters most.

netlogiccomputer.com/it-consulting

Technology should amplify your mission — not slow it down.

Nonprofits operate under unique pressures.

Limited budgets, compliance obligations, growing service demands, and small teams managing complex operations.

Technology should make that work easier, not harder.

Netlogic Consulting partners with nonprofit organizations to design and implement technology solutions that strengthen operations, protect sensitive data, and allow teams to focus on what matters most — **serving their communities.**

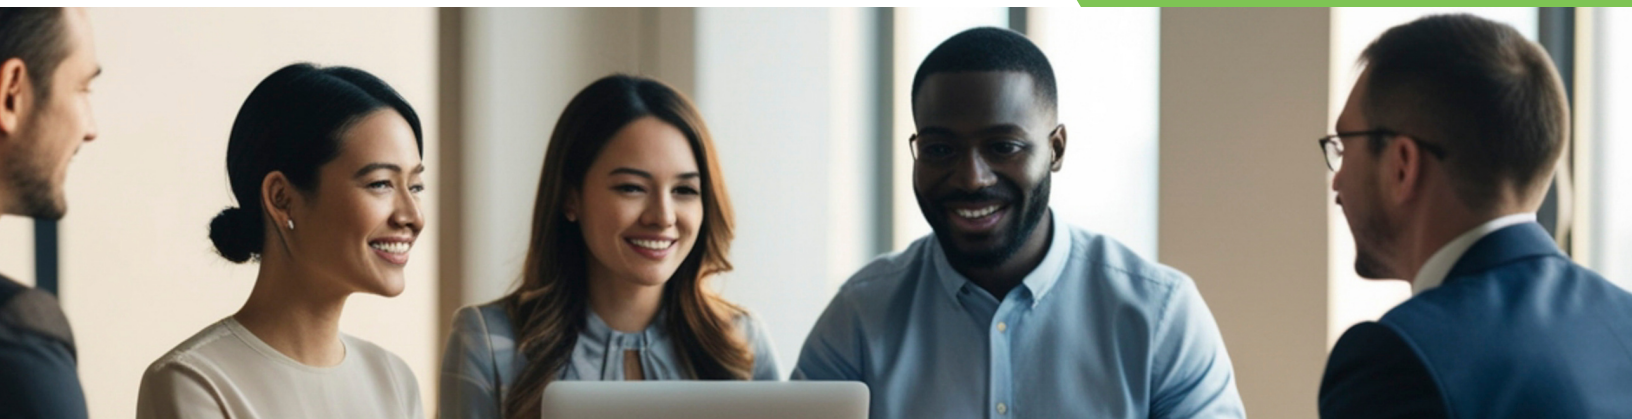

How We Support Nonprofits

We help nonprofits modernize operations while protecting resources. Our consulting approach focuses on helping organizations:

- ▶ **Improve internal collaboration**
- ▶ **Protect donor and client data**
- ▶ **Simplify operations and workflows**
- ▶ **Meet regulatory and compliance requirements**
- ▶ **Maximize nonprofit technology grants and discounts**
- ▶ **Build technology systems that support long-term growth**

We believe every nonprofit deserves access to technology strategies typically reserved for large enterprises.

Unlock the full power of Microsoft 365

Many nonprofits qualify for significant Microsoft technology grants and discounts, but navigating those programs can be overwhelming.

We help organizations:

- ▶ Secure nonprofit Microsoft licensing
- ▶ Deploy Microsoft 365 environments properly
- ▶ Build collaboration tools with Teams and SharePoint
- ▶ Implement security and compliance protections
- ▶ Automate workflows and document management
- ▶ Train teams to confidently use the platform

The result: a secure, modern workplace that supports both staff and volunteers.

Common technology challenges nonprofits face

- ▶ Disconnected systems and manual processes
- ▶ Limited internal IT resources
- ▶ Security risks for donor and client data
- ▶ Compliance concerns
- ▶ Inefficient document management
- ▶ Lack of long-term technology strategy

Netlogic helps nonprofit leaders move from reactive technology management to intentional, strategic systems.

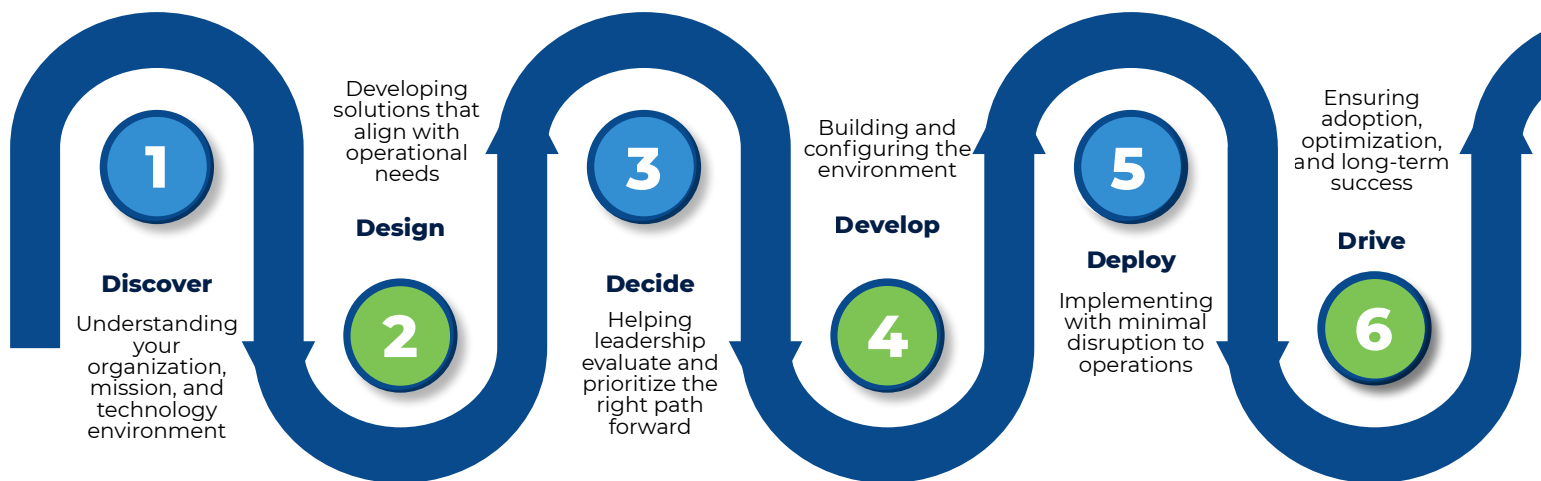

Our approach is collaborative, structured, and outcome driven.

We don't drop recommendations and disappear. We work alongside your team to ensure strategy becomes execution.

Our Six-Phase Consulting Framework

Ask about our six-phase framework guide if you would like a more in-depth look at our process.

Your mission deserves technology that works as hard as your team does.

Netlogic Consulting helps nonprofit organizations build secure, modern technology environments that support their mission today and scale with them into the future.

Let's build the systems that power your impact.

Netlogic Consulting is committed to helping nonprofit organizations turn technology complexity into clear strategy, strategy into effective execution, and execution into measurable impact. With the right guidance and a structured approach, technology becomes a tool that strengthens your mission instead of straining limited resources. We're here to provide clarity, expertise, and hands-on support so your team can move forward with confidence and focus on the communities you serve.
